## QUALITY POLICY

AVANZARE INNOVACION TECNOLOGICA S.L. (hereinafter AVANZARE) is a leading organization at the national level that dedicates its productive activity to manufacturing of nanomaterials, formulations and thermoplastic composites with varied and high qualities and applications, providing solutions based on nanotechnology. The AVANZARE products generate high added value and provide significant Advantages to customers, allowing them to compete both in price and performance.

The AVANZARE management team considers Quality a key factor in the development of its activities and a fundamental tool to achieve the satisfaction of the customers and other interested parties. In order to continue to provide solutions competitive, AVANZARE has implemented and maintains a Quality Management System (QMS) based on continuous improvement, whose scope is the "Design and manufacture of nanomaterials, formulations and thermoplastic composites".

The Avanzare management declares that the QMS is structured around objectives strategic and operational based on:

- Quality is based on the collaboration of the entire QMS team, being motivation, training and interdepartmental communication are essential, seeking maximum competence, efficiency, and effectiveness.
- It is the responsibility of the entire organization to meet the needs and requirements set by customers or interested parties, as well as the requirements legal and regulatory related to the product or service provided, always seeking the satisfaction of all interested parties.
- The evaluation of the risks associated with our productive activity, in order to minimizing them, it consolidates itself as the core of the QMS. Developing plans continuous improvement action contributes to commitment and support with management strategic.

For this, the Management undertakes to comply with the following aspects:

- Establish objectives and goals in accordance with the Quality Policy, which can be reviewed annually for its continued adaptation.
- Assure customers the supply of products according to the requirements specified and within the established time.
- Provide the necessary resources (training, personnel, and infrastructure) to maintaining continuous improvement.
- Disseminate the quality policy at all levels of the organization.
